

# WIRE MESH PANELS

Thiessen Team Wire Mesh Panels are constructed with mesh and brattice cloth. The panels are a 4' by 8', lightweight and can be cut to shape with small bolt cutters. When shotcrete is applied to these panels, the result is a durable, fireproof wall which is extremely resilient to close proximity blasting.

## ADVANTAGES

- Fast and easy to erect
- Fireproof
- Non-corrosive
- Very concussion resistant

## WHERE TO USE:

- Constructions of walls for lunchrooms and utility rooms
- Constructing bulkheads
- Protective walls for shaft areas
