

BETTY CROCKER Standard Concrete Mix

www.thiessenteam.com

DESCRIPTION

Standard Concrete is a pre-mixed, bagged product consisting of accurately weighed Portland cement, admixtures and specially graded coarse and fine aggregates. With the addition of water, thorough mixing, proper consolidation, finishing and curing, a quality concrete suitable for a variety of uses will be produced.

TYPICAL PROPERTIES

When mixed to a slump of approximately 75 mm (3 in) and adequately cured, Standard Concrete will develop compressive strengths of 21 Mpa / (3,000 psi) or more in 28 days.

PACKAGING

Available in 1 yard³, shrink wrap protected, or 1/2 yard³, shrink wrap protected Supersacks. Both bagged products are on 42" x 42" heavy duty timber pallet. Product is also available in Thiessen Team bulk delivery (13yd³ trailers).

OPTIONAL PROPERTIES

Strengths up to 40Mpa (6000PSI)

Admixtures that can be pre-blended into product

- *Air Entrainment (provides freeze/thaw resistance)*
- *Superplasticizer*
- *Accelerator*
- *Fiber reinforcement*
